Desktop Microphones

# Hand Microphones and Remot Speaker Microphones

## Features

- Dynamic or electret microphone capsule
- Omnidirectional or directional characteristic
- Robust hand microphones made of metal in silver and black
- Remote speaker microphones with durable plastic housings
- Protection class: up to IP68
- 1 to 3 buttons
- Hard-wearing and long-lasting coiled cables
- Solid holders and clips

## Applications

- Radio systems in mobile, portable and stationary use
- PA systems

# Gooseneck Microphones and Microphone Heads

## Features

- Dynamic or electret microphone capsule
- Omnidirectional or directional characteristic
- Robust microphone heads made of metal or plastic housing in silver and black
- Special versions with controls (PTT)
- Various gooseneck lengths (100 to 700 mm) and diameters (8 to 18 mm)
- Microphone heads can be combined with goosenecks individually

## Applications

- Radio systems
- Control centres
- Conference equipment
- Large vehicles
- PA systems
- Industrial applications

# Hands-free Microphones

## Features

- Directional or omnidirectional characteristic
- Small and compact designs
- Optionally with adjustable amplifier
- Various mounting solutions and brackets
- Very durable plastic housing

## Applications

- Radio systems
- Conference equipment
- Hands-free kits
- PA systems
- Vehicles

# Charging Cradles

## Features

- Vehicle charging cradles for portable radios to ensure operational capability in the event of an emergency
- Very durable and impact-resistant plastic housings
- Wide operating voltage range 8 to 32 V (DC) – perfect for cars and trucks
- High-quality contacts for maximum contact reliability and durability
- Smart light design: LED strips indicating the charging status and making it easier to find the charging cradle
- Supports all batteries which are supported by the radio's manufacturer
- E-approval for use in motor vehicles

## Applications

- Portable handheld radio devices

# Loudspeakers

## Features

- Compact design with high efficiency
- Very durable and impact-resistant plastic housings
- Horn loudspeaker for advanced environmental requirements
- Protection class: up to IP68
- Versatile mounting options
- Available as 4 Ohm and 8 Ohm versions
- Variants with integrated amplifier or volume control available

## Applications

- Radio systems
- PA systems
- Hands-free kits
- Special vehicles

# Desktop Microphones

## Features

- Desktop microphones with dynamic or electret gooseneck microphone
- Robust metal housings
- 1 to 3 function keys and LEDs
- USB version for computer-based control centre systems
- Optionally with integrated volume control, headset jack and socket for an external PTT button
- Various transmission options of HID inputs for easy plug & play integration

## Applications

- Control centres
- Conference equipment
- PA systems
- Radio systems

# Handsets

## Features

- Operating handsets with display and keypad as well as devices for simple voice communication
- Durable and flame-retardant plastic housings
- Hard-wearing and long-lasting coiled cables
- Solid, large PTT buttons
- Various versions of hearing and speech systems
- Operating elements such as function keys, volume and complex keypads with navigation buttons
- Integrated display: monochrome or colour display
- Audio amplifier and complex circuits with microcontrollers
- Cradles with latching, magnetic or unlocking release mechanism

## Applications

- Radio Devices
- Radio Systems
- Mission Critical
- Satellite Radio Devices

# Minor Modifications and Individual Adaptations

## Take advantage of the opportunities!

Whether individual pin assignment, special connectors as well as special lengths of goosenecks or cables. Even in small series, we offer numerous possibilities of modifications and individual adaptations of our products to meet your special requirements.

## Advantages - economical, flexible and fast

You receive a ready-to-connect product that you can connect and use directly after unpacking (plug & play). The individual products are subject to a 100 % function and quality control. With full warranty, we assure you the adaptation to your specific system. Directly from us as the manufacturer, we supply you with an individual, completely assembled and tested product. In doing so, you save on further effort and associated costs.

## Individual advice

Get a straightforward quote, attractive and clear pricing as well as fast implementation and delivery for your individual product adaptation from 50 pieces.

Let us advise you and enquire now!

# We ensure Communication

Development, production, distribution – everything from a single source

pei tel, a company of the Peiker family, stands for professional equipment for perfect voice and data transmission for over 30 years. We are specialized in the development, production and distribution of high-quality communication solutions.

Our extensive product range includes professional radio devices and infrastructure technology from renowned manufacturers as well as own developments of microphones, handsets, loudspeakers, desktop microphones and further professional radio accessories and communication devices.

In addition, we offering broadband solutions for installation in vehicles and systems, as well as PTToc devices (Push-to-Talk over Cellular), equipped with LTE/4G, Wi-Fi, Bluetooth, VoLTE, NFC, GPS, and more. Our broadband solutions are combining essential voice and group communications, multimedia data transmission and location services into one ecosystem.

We are ISO 9001 certified and developing our own products in Germany. In doing so, we attach great importance to compliance with technology, environmental and quality standards.

Individual customer requests as well as applications and special solutions, which are specifically tailored to the customer's requirements, are given special consideration by us. Feel free to contact us at any time!

Your competent partner
